Barefoot World Atlas is a magical, interactive 3D globe that invites children to explore the regions and countries of the world. As they travel around the site they discover hundreds of fascinating features and immerse themselves in the rich wonders of our planet.

Users glide over the hundreds of stunning, hand-painted drawings and animations that cover the globe, and listen to how the music changes as they travel from region to region.

Barefoot World Atlas includes a variety of playful puzzles that allow children to test their knowledge of all the facts, figures and features in the app, in a variety of imaginative ways.
