

FIELD READY

TRANSFORMING LOGISTICAL SUPPLY CHAINS FOR AID

Project URL: www.fieldready.org

Project Twitter: [@FlDRdy](https://twitter.com/FlDRdy)

- Health
- Safety & Security
- Physical Computing

Field Ready provides disaster relief and meets humanitarian needs by transforming logistical supply chains. It achieves this through technology and engaging people in new ways. In practical terms, this might be sending volunteers with technical knowledge to areas of need who will then use advanced manufacturing technologies, such as 3D printers, to help. In this way, supply chains are vastly improved and in some case virtually eliminated. Field Ready also involves training others and exposing people to localised problem-solving, human-centered design and 'making' in ways they can immediately benefit from.
