- Environment & Sustainability

JustPark helps people to rent out spots at their businesses or homes to drivers via a smartphone app and website.

In August 2014, it announced a partnership with BMW, who plans to develop a JustPark dashboard app to be built into their Minis and Rolls-Royces.

The platform currently has over 70,000 customers in the UK and there are around 150,000 parking places on offer through the service.

St Pancras Parish Church on Euston Road in London has made nearly £70,000 using JustPark to rent its parking spaces to people travelling from Euston and King's Cross stations.
