In January 2012, Hazloposible Foundation launched Microdonaciones.net, a crowdfunding platform that allows people to meet and collaborate economically with different Spanish NGO projects. The focus is on small and medium-sized entities, which have more problems finding funding than others.

So far the organisation has managed to raise 242,885 euros for 85 NGOs that work in 25 different countries. Most Microdonaciones.net projects try to cover basic needs that influence the daily life of a family, an individual or an entire community, such as the education of children in a village in Africa or the installation of solar panels in a village.
