## IMPROVING PUBLIC TRANSPORTATION THROUGH INFORMATION AND FEEDBACK

Project URL: [moovitapp.com](http://moovitapp.com)

Project Twitter: [@moovit](https://twitter.com/moovit)

- 

Moovit wants to make it easier for people to use public transit options such as buses, trains and tubes.

Using a combination of public-data feeds and feedback from users it provides a full overview of public transportation services both in your area and for forward travel planning.

Founded in 2011, the company now has over 28 million users worldwide and, in January 2015, raised \$50m from investors including Nokia Growth Partners and BMW.
