- Community Engagement
- Education
- Social Software
- Internet

Established to support young creative writers, Movellas is a publishing platform for short stories. As well as publishing, users can read and review each other's work, and take part in writing competitions. There are also a large number of user groups: one is specifically for 'First Movellas', while the preponderance of 'One Direction' groups is neatly counterbalanced by a group specifically "For Movellas that are NOT about 1D".
